

Bootloader upgrade for old eWON

Since firmware version 5.2, the Bootloader of the eWON must be greater than 2.0.

Every eWON produced with a serial number greater or equal to 0648-xxxx-xx has already this bootloader 2.0.

To upgrade to a higher firmware version an eWON that was produced before 0648-xxxx-xx, the bootloader must be upgraded first.

To do so, follow these steps:

1. Your eWON MUST be in 5.1 firmware version.
Visit the [Manual Firmware Update](#) webpage to download the relevant firmware.
2. Upload the bootldr.bin file to the eWON by FTP.
Extract bootldr.bin from the [bootldr2_4.zip](#) file and put it on eWON FTP root.

There is no need to reboot after the bootloader upgrade. This means that you can upload the .bin file and then directly perform the upgrade via eBuddy.

The eWON data and config are NOT affected by this upgrade.

- Important -

You should not remove the power during a bootldr upgrade.
